Description

Operators in the petro-chemical industry are increasingly required to undertake their skills and knowledge training on-the-job in small grabs of time between work duties. The industry makes extensive use of computer technology, company Intranets and the Internet. This Toolbox provides a flexible training environment that allows learners to conveniently access the training from any of their work stations within a single plant, from multiple plant sites or wherever their work takes them including new job roles and employment opportunities.

Note: This Toolbox is a revision (Version 3) of the original. For more details visit:
