- TDTF697B Apply emergency/accident procedures

### Description

The Virtual Warehouse provides an online learning environment to support the delivery of the Certificate II in Transport and Distribution (Warehousing). The learning environment consists of a number of components that have been established to simulate the operation of a Warehouse. It is recognised that all Warehouses are different in their operations. The Virtual Warehouse has been established using a manual paper-based Warehouse, as its model. This has been done so that the learner has to be involved in the decision making processes in all steps of the Warehouse operations.
