

Training Package

CUF01 Film, TV, Radio and Multimedia
ICA99 Information Technology

Qualifications

CUF60501 Advanced Diploma of Multimedia
CUF30101 Certificate III in Screen
ICA41101 Certificate IV in Information Technology (Website Design)

Competencies

CUFRAD01A Originate and develop the concept
CUFMEM04A Test a multimedia product
CUFMEM06A Design a multimedia product
CUFMEM07A Apply principles of visual design and communication to the development of a multimedia product
CUFMEM08A Apply principles of instructional design to a multimedia product
CUFMEM09A Apply principles of game design to a multimedia product
CUFMEM10A Design and create a multimedia interface
CUFMEM11A Design the navigation for a multimedia product

Description

This Toolbox has eight clearly defined areas each addressing a different unit of competency.

The student works with another learner, a mentor and a trainer. The design has discrete roles for all three which are well complemented by the resources provided in the Toolbox.

Because the media-communications industry is based on collaborative partnerships and team work, the resource sets out to replicate the collaborative environment of the industry as much as possible.

The Toolbox is comprised of activities and resources provided in a very structured and linear fashion. Students choose their area of interest eg. Interface design and work their way through a series of exercises or 'briefs'.

Each brief provides a *context* (background information), *directions* (what needs to be done), *sources* (links to resources), a *network* (email addresses of their fellow students, mentor and trainer), and a *report* (a downloadable file that is used to record work).
