

**Training Package**

BCG03 General Construction

**Qualifications**

BCG10198 Certificate I in Construction

BCG20198 Certificate II in General Construction

BCG30798 Certificate III in General Construction (Carpentry - Framework/Formwork/Finishing)

**Competencies**

BCG1004A Carry out measurements and calculations

BCG1010A Carry out concreting to simple forms

BCG2004A Carry out levelling

BCG3025A Install external or internal doors

**Description**

The Building Skills Toolbox is designed to be used for apprentices and pre-apprentices in the building and construction industry around Australia. In particular, it is for those involved in concreting, levelling and installing doors. Whilst it aims to specifically meet the educational needs of indigenous learners - particularly those studying and working in remote areas - this resource is also relevant to all learners studying the four addressed competency standards.

Building Skills uses the scenario of building a bush kitchen to introduce learners to basic building skills including concreting, levelling, installing doors and measurements.

Teachers/trainers will find the Toolbox has a consistent structure. Information is organised by competencies. Each competency has a number of tasks (jobs) and skills. Each task has a number of steps to complete as well as a consolidation 'Have a go' activity. Learners can check their understanding of the content and identify gaps in their knowledge. Each competency culminates in a hands on, workplace based, practical activity set up by the teacher/trainer.

Features of the Toolbox include:

- practical, scenario-based, interactive activities that provide an authentic context in which learning can take place
- a constructivist learning approach
- multiple pathways through the resource to suit different learning and teaching styles.

The Toolbox allows for both guided learning and exploratory learning. It is intended that the teacher/trainer determine how the Toolbox is to be used by learners.
