

Training Package

RTE03 Rural Production
RTF03 Amenity Horticulture

Qualifications

RTF30103 Certificate III in Horticulture
RTF40103 Certificate IV in Horticulture
RTF50103 Diploma in Horticulture
RTE20203 Certificate II in Irrigation
RTE31303 Certificate III in Irrigation
RTE40203 Certificate IV in Irrigation

Competencies

RTC3016A Provide information on plants and their culture
RTC3404A Control pests, diseases and disorders
RTC3401A Control weeds
RTE2606A Maintain pressurised irrigation systems
RTE3601A Install irrigation systems
RTE3611A Operate pressurised irrigation systems
RTE4604A Determine seasonal irrigation scheduling tasks
RTF4007A Prepare a garden design
RTF4023A Promote plant health

Description

The learner is immersed in the workplace metaphor of Jirralee Botanic Garden. This garden is open year-around for the public to visit to enjoy the wide variety of plants, landscaping and water features. The online learner plays the role of a member of garden staff that oversees the day-to-day running, maintenance and management of the site. The structure of the garden supports authentic learning in a variety of irrigation activities. Similarly, the diversity of plant species facilitates a range of learning activities in the plants, pests and diseases and garden design units. All units include an awareness of environmental implications and occupational health and safety (OHS) issues.
